Goulven VERNOIS

Dear Sir,

A - Translation mistake in the English PCT text

In the original french text, page 1, "*Réponse de l'invention au problème posé*", second paragraph, one can read :

L'invention introduit un aspect fondamental nouveau dans la distribution des données informatiques : la possibilité pour les producteurs de ces données, ou les labels les représentant, de charger ces données quasi automatiquement sur le moyen de stockage de masse, au prix de la location du volume de ce moyen de stockage de masse occupé par ces données chargées.

The translation has been, page 1, line 40 :

"The invention intruduces a new fundamental aspect into the distribution of the data: the possibility for the producers of these data, or for the labels representing them quasi automatically to charge these data on the mass memory of a slot-machine..."

This is bad because the English translation of this French "charge", in computer language, is "load".

The correct English text becomes :

"The invention intruduces a new fundamental aspect /.../ quasi automatically to charge load these data on the mass memory of a slot-machine..."

ASK FOR AMENDMENT

So, I ask for the replacement of the word "charge" by the word "load" in this paragraph.
